

### **WATER TREATMENT SERVICES**

On-site treatment of wastewater can save thousands of dollars in truck transportation charges and disposal fees. Green Star's capabilities in the area of mobile water treatment services cover a broad spectrum that includes permitting, operations, monitoring, and discharge reporting. We can perform on-site treatment periodically; or, depending on the nature of the project, we can train your personnel to perform certain aspects of the operation, offering even greater cost savings. Green Star's senior environmental personnel, including professional engineers and compliance experts, provide clients quality project design and permitting services, supported by our skilled technicians who set up and operate the systems.

Whether discharging to publicly owned treatment works (POTWs) or operating under the guidance of state mandated permits, Green Star will handle all aspects of the disposal process. Our comprehensive services include:

- ★ Initial water sampling to ensure applicability
- ★ Negotiations, permitting, and filing with local and state agencies
- ★ Field surveys to determine optimum discharge points
- ★ Quality control sampling during discharge
- ★ Post-discharge reporting
